Always Go Above and Beyond!

Science

Rubber Eggs

What an exciting week we had in science! All week long we have been putting a regular egg through some fantastic changes. We removed the shell, leaving only the membrane, soaked the egg in water and then pulled the water out with corn syrup. Ask your child about this marvelous scientific experience.

Spelling Words and Tests:

Each week, we will have a new list for spelling. The students can find the list on Trubyville, as well as in their spelling books. The students are to study the first 30 words and will be tested on them every Wednesday. They will get a second chance at spelling the words correctly on Friday if any words are missed on the Pre-Test. There are 5 dictation sentences as well.

KIDS

Math

We started full force in our math book this week. The kids are learning the new terminologies that this curriculum has to offer.

They have a daily Power-Up time where they review math facts, practice their mental math and work on their problem solving skills. I have been very pleased at how everyone is adapting to this new series.

Reading

We completed several activities this week on our summer reading books and are ready to move on to our first novel, Tuck Everlasting.

Meet the Teacher

Thanks to all the parents that came to Meet the Teacher night. I hope I gave you a lot of helpful information. I thoroughly enjoyed meeting you and look forward to a great year!

Band starts next week!

Being Responsible Students

I am tickled by the number of students that finished their Dailies ahead of time this week, especially since this was the 1st full week of school.

Overall, everyone did a great job of completing their D's and learning to use their voice when they didn't understand something. Please keep encouraging your students to work ahead. They are doing a great job!

Emma's "Rubber Egg" turned out perfect.
